

## Get the maximum cooling capacity of your portable AC!

Avoid complicated wall openings and keep maximum cooling capacity indoors. With Wood's Skylight Sealing Kit, you avoid hot air coming back into the room, which significantly affects cooling capacity and energy balance. Our sealing kit also prevents dust, dirt, and insects from entering the room.

## Wood's Skylight (Roof Window) Sealing Kit

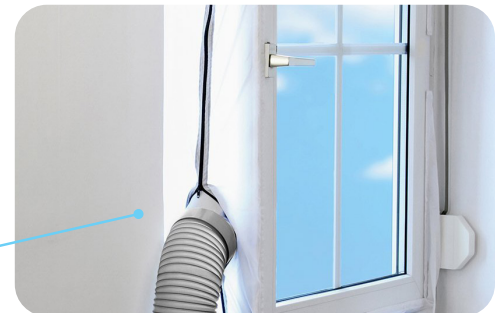

The window cover can be installed between a window and the frame with very little effort. The flexible and adjustable zipper opening makes it possible to place the seal for all types of roof windows. After installation, windows can be closed without difficulty, when leaving the premises.

This technology makes our Skylight Sealing Kit versatile. A zipper on each of the openings allows a precise match to the hose's diameter and nozzle size to prevent warm, outdoor air from entering the room which reduces power consumption. In addition, you can reliably keep dirt and insects away!

### Wood's Skylight (Roof Window) Sealing Kit

Works on all portable AC models  
Easy to assemble

EAN Code: 7332857502257  
Measurement: 200x39cm
